The planters are available in three different sizes with trellises made in three different heights. The planters shown here constitute Cacti Group 1.

Cacti Planters

ANKI GNEIB

These indoor/outdoor planters can refresh everyday environments with vivid colours and vibrant plant life. The products are made with metal trellises that mimic the shapes and proportions of cacti. The planters bring nature indoors, adding decorative features or dividing the space. Plants dampen noise and improve air quality. The planters are available in three different sizes with trellises made in three different heights.

Variants

The group of planters is designed with three different combinations.

Character

Colourful planters made with metal trellises. They are available in three different sizes with trellises made in three different heights.

Integrating plants into indoor environments has become increasingly important. They meet the need for space-creating, sound-absorbing and visual screens. The Cacti planters are inspired by Mexican artist Frida Kahlo's cactus 'wall' planted her garden in Mexico. Cacti's elegant vessels in varying colours are available in three sizes with varying trellis heights and come in three different combinations. By choosing different types of plants, you can easily create a flexible, stylish room divider or room accent. *Cacti systembeskrivning*

Cacti planters displayed during Stockholm Design Week with plants arranged by Claes Carlsson.
