Gry Furniture Group

DESIGN FREDRIK MATTSON

The Gry furniture group was designed with a focus on comfort, functionality and durability. These characteristics come together in a clear expression of simplicity, enabling Gry to voice contemporary elegance. Each product in the Gry series is crafted with restrained proportions and authentic materials, their outlines softened by rounded steel parts forming each frame. The designs in the Gry series slot easily into a wide range of outdoor environments. Optional armrests, swivel bases and tabletops can be added.

CERTIFICATION

Dimensions and weight**Gry Park Bench**

Length: 155 cm / 167 cm

Height: 76 cm

Sitting height: 45 cm

Depth: 55 cm

Vikt: 45 kg

C-C stand: 89 cm

Width of armrests: 6 cm per side

Individual dimensions

Wood components: 105 x 32 mm

Steel pipe: Frame: Ø 32 mm. Legs: Ø 60 mm

Foot plate: Ø 200 mm

Gry Bench

Length: 155 cm / 167 cm

Height: 68 cm

Sitting height: 45 cm

Depth: 38 cm

Vikt: 28 kg

C-C stand: 89 cm

Width of armrests: 6 cm per side

Individual dimensions

Wood components: 105 x 32 mm

Steel pipe: Frame: Ø 32 mm. Legs: Ø 60 mm

Foot plate: Ø 200 mm

Gry Chair

Width: 50 cm / 62 cm

Height: 76 cm

Armrest height: 21 cm

Sitting height: 45 cm

Depth: 55 cm

Vikt: 17 kg

Width of armrests: 6 cm per side

Individual dimensions

Wood components: 105 x 32 mm

Steel pipe: Frame: Ø 32 mm. Legs: Ø 60 mm

Foot plate: Ø 200 mm

Gry Stool

Length: 50 cm

Height: 45 cm

Depth: 38 cm

Vikt: 12 kg

Individual dimensions

Wood components: 105 x 32 mm

Steel pipe: Frame: Ø 32 mm. Legs: Ø 60 mm

Foot plate: Ø 200 mm

Gry Table Round

Height: 72 cm

Ø: 61 cm / 80 cm / 110 cm

Vikt: 19 kg / 28 kg / 38 kg

Individual dimensions

Wood components: 105 x 32 mm

Steel pipe: Frame: Ø 32 mm. Legs: Ø 60 mm

Foot plate: Ø 250 mm

Gry Table - Rectangular

Length: 155 cm

Height: 72 cm

Depth: 71 cm

Vikt: 48 kg

C-C legs: 89 cm

Individual dimensions

Wood components: 105 x 32 mm

Steel pipe: Frame: Ø 32 mm. Legs: Ø 60 mm

Foot plate: Ø 250 mm

Gry Table - Square

Width: 71 cm

Height: 72 cm

Depth: 71 cm

Vikt: 31 kg

Individual dimensions

Wood components: 105 x 32 mm

Steel pipe: Frame: Ø 32 mm. Legs: Ø 60 mm

Foot plate: Ø 250 mm

Materials and surface treatments**Pine**

Nola's pine is of high quality and comes from sustainable forestry. Pine is an environmentally friendly, domestically produced material. Damaged or untreated pine is quite easily attacked by decomposition processes; therefore, it is particularly important to repair damaged surfaces.

Oak

Oak is a heavy, hard and medium tough wood. Moderately dimensionally stable in case of moisture changes. Oak wood blackens if it is exposed to moisture or wetness for a long time. However, it does not affect the other properties of the

wood. Thanks to its hardness and toughness, the oak wood is suitable for furniture and other use in exposed environments.

Wood oil

Wood oil provides good protection against the stresses of the outdoor climate and at the same time highlights the wood's natural appearance and properties.

Linax

After traditional impregnation according to NTR AB, the wood is boiled in a hot linseed oil with or without color pigments under vacuum. The oil is penetrated into the surface on all six sides, which reduces moisture absorption in the wood and gives a dimensionally stable product over time. The result is a dried product with good resistance to rot that also has long maintenance intervals.

Steel

Nola uses high-quality steel with good strength in our products. Steel rusts if left untreated and must therefore be surface treated. This is done through electro-galvanization and powder coating, hot-dip galvanizing, or application of a zinc powder primer.

Electrogalvanized

Electrogalvanizing (also known as zinc plating) provides corrosion protection through the sacrifice of zinc ions. It is created via a zinc coating on the steel using an electric current.

Powder coating

Powder coating is a coating that is applied as a free-flowing, dry powder. Unlike conventional liquid paint, powder coating is usually applied electrostatically and then cured under heat or with ultraviolet light. The result is an even, hard-wearing coloured surface with the desired gloss level.

Assembly and placement

In-ground

Cast in ground.

Surface mount

Can be bolted above ground, to the floor or to a cast-in-place foundation. Bolts not included.

The products are delivered partially assembled ready for the main parts (tabletop, seat and backrest) to be bolted to the frame with the screws included.

Maintenance

Gloss 70. Powder coating can be ordered in a spray bottle.

Oiled oak

Oiled oak should be oiled twice a year for best protection. Good maintenance can never completely prevent stains from occurring, but oak that is not maintained will turn blacker and turn gray faster, but it still has a very long life. When re-oiling products, a finely boiled oil that penetrates the wood should be chosen over a film-forming oil.

Linax impregnated pine

Linax is a linseed oil-based impregnation that provides extra long durability in outdoor environments and corresponds to impregnation class AB. The impregnated wood turns gray over time, which means that it should be re-oiled if necessary. Use a linseed-based oil for impregnated materials.

Powdercoated steel

Products that are electro-galvanized and powder-coated can be touch-up painted with alkyd paint.
