RECYCLING BINS

## COMPANY PROFILE

R&D Management System  
certified by AENOR

**Cervic Environment**®, a family company with **over 55 years of history**, a leader in Spain with **presence in over 35 countries**. We are specialized in the **design and manufacture of Recycling bins for selective waste collection and Street furniture**.

Our slogan '**Looks Smart, Works Better**' perfectly defines our work philosophy at Cervic Environment. For us, design is more than just the appearance of a product; it also should maximize the functionality and reliability. That's **why our products, beyond their careful aesthetics, feature excellent functionality, reliability, and durability, which fosters customer loyalty**.

**Certified under standards ISO 9001 (Quality), ISO 14001 (Environmental), and ISO 56000/UNE 166002 (Innovation)**. We ensure high operational and quality consistency, delivering value-added solutions that are highly competitive, reliable, sustainable, and aligned with emerging market needs and trends.

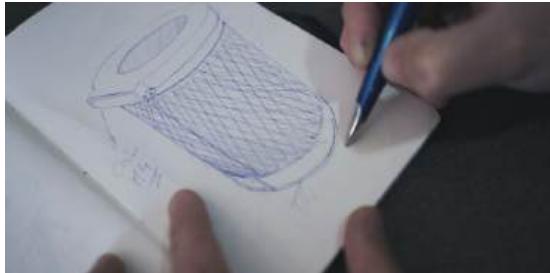

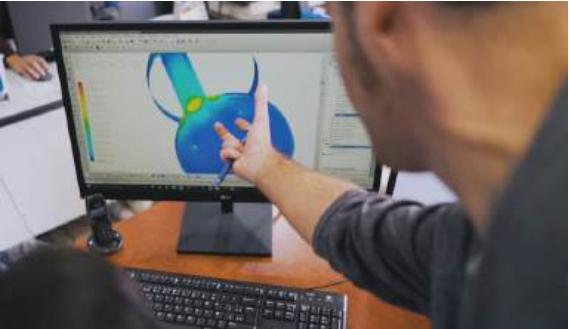

Cervic Environment's strong points is our **ability to develop and manufacture bespoke products**. We adapt our existing products or create new ones based on the specific needs of our clients. To achieve this, **we have our own engineering/design department and production facilities**.

At Cervic Environment, each of our steps is **aligned with the commitment to a sustainable business project**, advocating for a **circular economy business model** characterized by **Eco-design** and the sustainable use of resources in production. **We develop environmentally-friendly products** that incorporate **recycled materials**, with **significant durability and fully recyclable at the end of their life**. We calculate the carbon footprint and carry out life cycle analysis of our products (LCA) in order to continuously improve our processes and products, making them increasingly sustainable.

From our **9000m<sup>2</sup>** facilities located in Ibi (Alicante) Spain; **we design, manufacture and supply our products worldwide**.

# | LOOKS SMART, WORKS BETTER

- At Cervic Environment, “design is more than the look of a product, design is above all how the product works”.
- Our quality designs, with great functionality and reliability lead us to have very loyal customers.

## *CERTIFIED SELF-EXTINGUISHING BINS*

Cervic environment has one of the most extensive range of Self-Extinguishing bins.

Cervic Self-extinguishing bins, due to their specific configuration & design, keep the fire inside the bin (avoiding the fire to come out and spread). Additionally the Self-extinguishing bins turn off the flames in the inside by themselves, extinguishing the fire this way.

Specially suitable for public buildings and facilities such as airports, subway stations, train stations, schools, universities, etc.

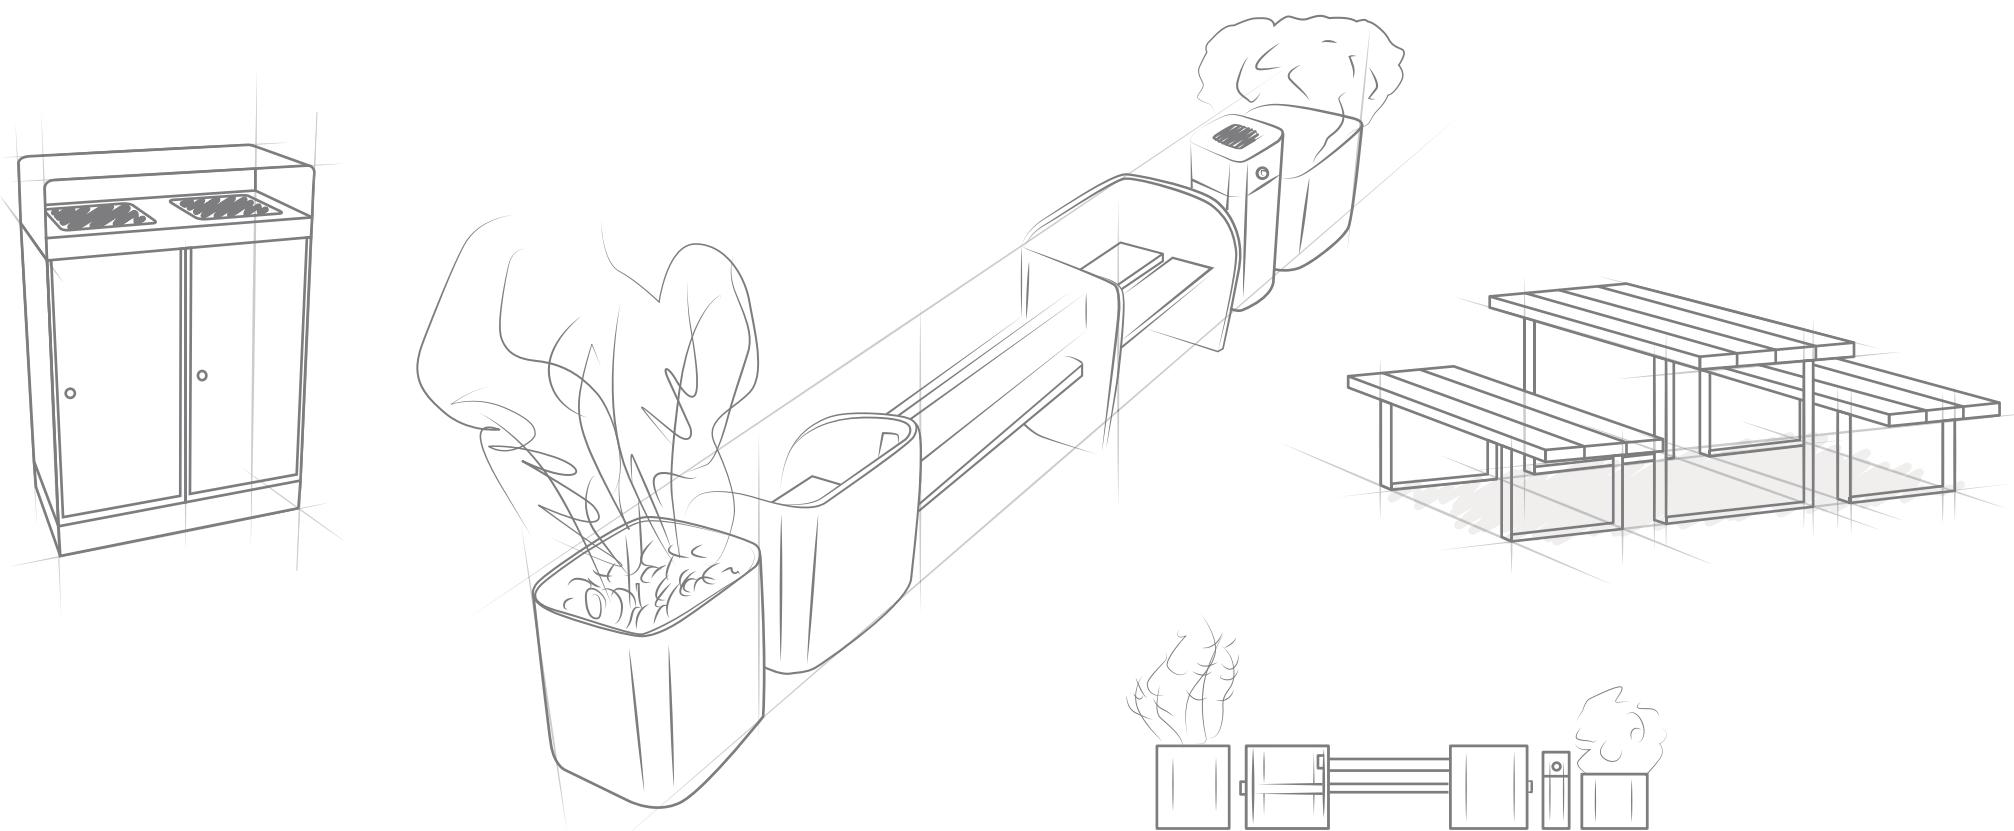

Certified by the Fire Lab Institute. All the bins have passed the test and have obtained the Self-Extinguishing Certificate according to the standards of DIN 31000:2011 and DIN EN ISO 13857:2008.

Check the available bins with a self-extinguishing system in our catalogue. They can be identified by this stamp:

# **CUSTOM MADE PRODUCTS**

The hallmark and the strength of Cervic Environment is, without a doubt, our capacity and flexibility to develop custom made products by adapting our own products or creating an entirely bespoke design to suit the customer's particular needs.

# SUSTAINABILITY

At Cervic Environment, every step we take is aligned with our commitment to a sustainable business project, embracing a circular economy business model.

## ECODESIGN

We apply Ecodesign methodologies and finite element engineering (FEA) in the development of our products

## RECYCLED MATERIALS

We incorporate recycled materials while maintaining high standards of quality, functionality, and aesthetics.

## RENEWABLE ENERGY

We manufacture using renewable energy sources (self-consumption photovoltaic panels).

## RECYCLABILITY

Our products are fully recyclable. They include information for proper selective segregation of materials at the end of their useful life.

## CORPORATE CARBON FOOTPRINT

We have an active plan to reduce our corporate carbon footprint, contributing to the reduction of greenhouse gas emissions. Cervic Environment is registered in the Carbon Footprint Register of the Spanish Climate Change Office (MITECO) and has obtained the 'Carbon Footprint Reduction Seal'.

## PRODUCT CARBON FOOTPRINT

We calculate the carbon footprint of our products to understand and reduce their environmental impact.

## LIFE CYCLE ASSESSMENT (LCA)

We carry out LCA of our products with a comprehensive "Cradle to Grave" approach to identify environmental improvement opportunities toward more sustainable models

## CERTIFICATIONS: ISO 14001 – ISO 9001 – ISO 56000 / UNE 166002

Foldable and reusable. Quick and easy assembly. Without adhesive nor glues.

Includes a set of adhesives with multiple combinable options of colors and waste symbols to be placed on the lid to identify the type of waste to be deposited.

The bag is secured in place by the removable lid covering  
Body made of cardboard and lid made of plastic.

Check page 120 for specifications.

# BIOBIN

**Color**

Bin with 10L capacity, vented, with hinged lid & ergonomic handle.

Collection system: Compostable bag (not included).

Vented: The holes in the bin (using a compostable bag), facilitate the transpiration of the liquid contained in the organic residue, (the waste is kept in aerobic conditions during the days in which the bag is filled) so it reduces the accumulation of leachates and bad odours.

With a cleft in the base and ergonomic handle with safety system to help the emptying

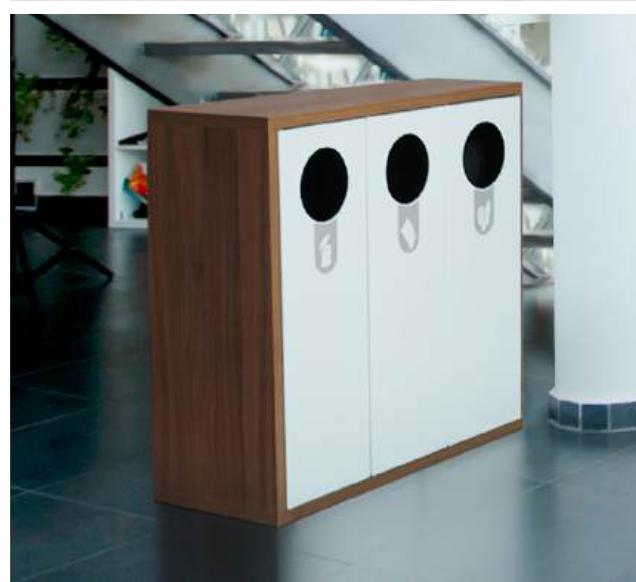

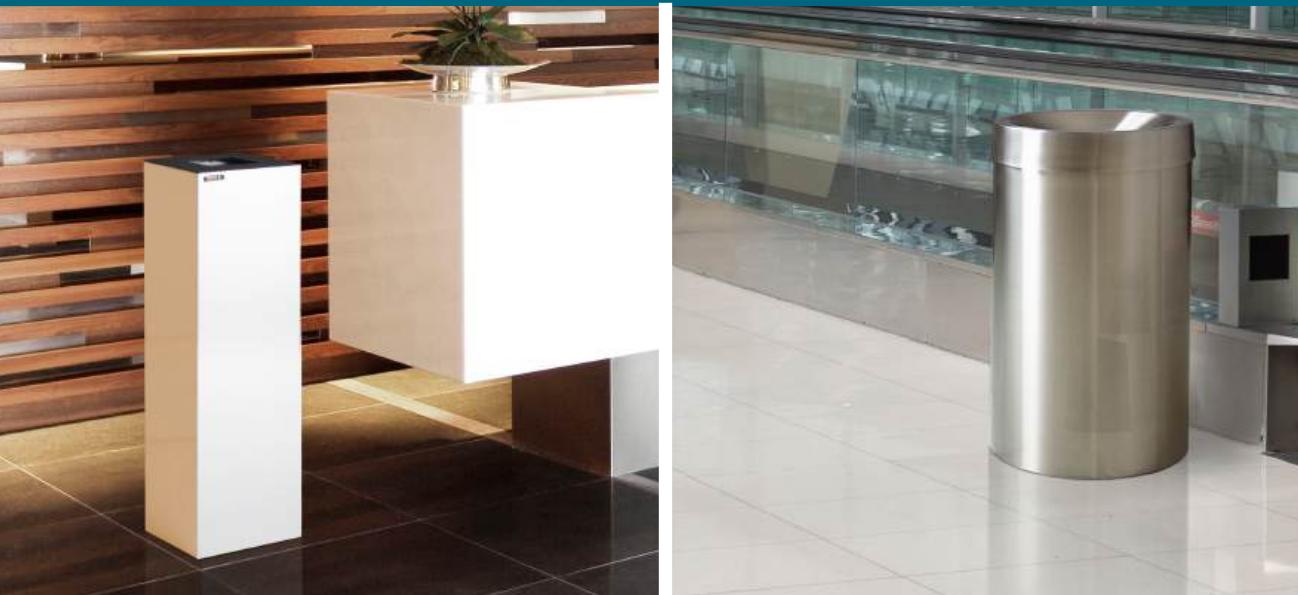

Stackable, optimizing transport and storage costs.

Frontal area can be customized by IML (consult conditions and MOQ).

Made in Spain with plastic polypropylene (with more than 15% recycled material) and 100% recyclable. Check page 120 for specifications.

## boards

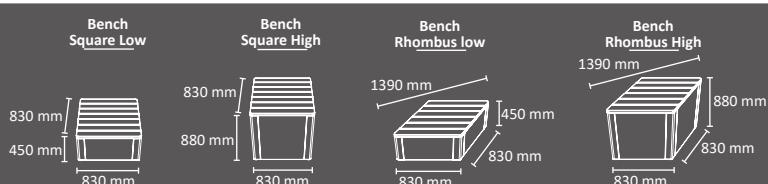

Modular system of Benches and Planters, with versions of different heights and shapes (square and rhombus) that can be combined with each other, creating resting areas with unlimited possibilities of configurations in shapes and sizes. The benches are available with three boards options for the seating area:

- 1) Recycled plastic (Recyplast).\*\*\*
- 2) WPC-Wood Plastic Composite brushed.\*\*\*
- 3) Tropical Wood.

\*\*\* Are versions with eco-friendly boards. Do not require maintenance. Highly resistant to adverse weather conditions.

Structure made of galvanized steel.

# FLORENCE Bench & Chair

## boards

Bench and Chair, both available without or with backrest.

Benches and chairs can be installed individually or in groups forming sets.

Available with 3 types of boards:

- 1) Recycled plastic (mixed version made of metal and recycled plastic-RecyPlast)\*\*\*
- 2) WPC-Composite wood (mixed version made of metal and ecological composite wood).\*\*\*
- 3) Wood (mixed version made of metal and tropical wood).

\*\*\* Ecological versions. Do not require maintenance. Especially recommended for promenades, coastal areas or places with high exposure to saline corrosion.

Accessories (optional): backrest for bench, backrest for chair and armrests for bench and chair.

Support structure made of galvanized and pickled steel with anticorrosive primer.

# FLORENCE Double Bench

Double-sided bench that forms part of the Florence collection.

Collection consisting of a Bench, Double bench, Chair, Table and Planter.

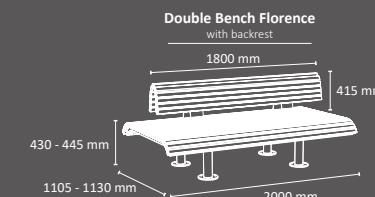

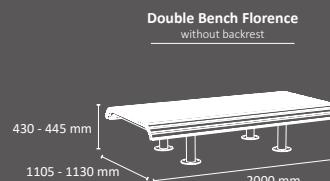

Available with 3 types of boards:

- 1) Recycled plastic (mixed version made of metal and recycled plastic-RecyPlast)\*\*\*
- 2) WPC-Composite wood (mixed version made of metal and ecological composite wood).\*\*\*
- 3) Wood (mixed version made of metal and tropical wood).

\*\*\* Ecological versions. Do not require maintenance. Especially recommended for promenades, coastal areas or places with high exposure to saline corrosion.

Accessory (optional): double-sided backrest.

Support structure made of galvanized and pickled steel with anticorrosive primer.

# FLORENCE Table & Chair

## Table and Chair (with or without backrest).

The table and chairs are not attached; they are installed independently, and it can be added from one to four chairs to the table (one on each side).

The table can be installed individually or accompanied by Florence benches and chairs.

Available with 3 types of boards:

- 1) Recycled plastic (mixed version made of metal and recycled plastic-RecyPlast)\*\*\*
- 2) WPC-Composite wood (mixed version made of metal and ecological composite wood).\*\*\*
- 3) Wood (mixed version made of metal and tropical wood).

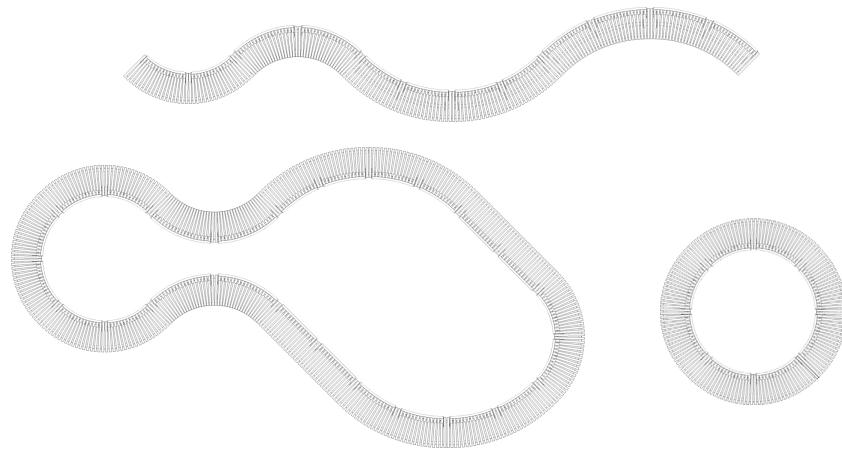

\*\*\* Ecological versions. Do not require maintenance. Especially recommended for promenades, coastal areas or places with high exposure to saline corrosion.

Accessories (optional): backrest and armrests.

Support structure made of galvanized and pickled steel with anticorrosive primer.

# MALAGA Bench

available version made of recycled materials  
60%

Modular and versatile bench, which allows the creation of countless possible configurations with sinuous, straight or even totally circular shapes (surrounding trees, planters, etc).

Formed by curved and straight modules that can be connected to each other.

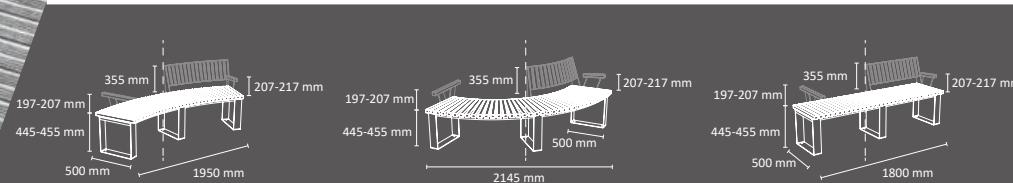

Available in 3 versions:

- 1) Recycled plastic (mixed version made of metal and recycled plastic-Recyplast)\*\*\*
- 2) WPC-Composite wood (mixed version made of metal and ecological composite wood) \*\*\*
- 3) Wood (mixed version made of metal and tropical wood).

\*\*\* Ecological versions. Do not require maintenance. Especially recommended for promenades, coastal areas or places with high exposure to saline corrosion.

Accessories: backrests and armrests.

Support structure made of galvanized and pickled steel with anticorrosive primer.

## MALAGA Picnic

### boards

Picnic set consisting of a table and two benches.

(Table and benches can be ordered separately).

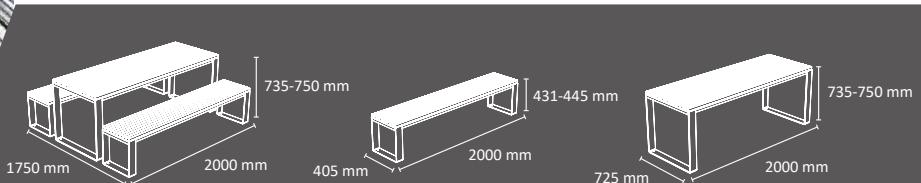

Available in 3 versions:

- 1) Recycled plastic (mixed version made of metal and recycled plastic-Recyplast)\*\*\*
- 2) WPC-Composite wood (mixed version made of metal and ecological composite wood).\*\*\*
- 3) Wood (mixed version made of metal and tropical wood).

\*\*\* Ecological versions. Do not require maintenance. Especially recommended for promenades, coastal areas or places with high exposure to saline corrosion.

Two installation options: a) Independent or b) Joined set.

Support structure made galvanized and pickled steel with anticorrosive primer.

# MALAGA Chaise longue

## boards
