Hoop Bike Stand

Broberg & Ridderstråle

The Hoop bike stand is a multi-functional urban design that can also function as a bollard. The design is simple, consisting of a single aluminium post where multiple bicycles can be securely fastened.

The upper ring is positioned so that locks can be attached securely from any direction.

*Left:
Hoop comes in two standard colors, black and grey,
but can be supplied in other colors for additional costs.*

*Below:
Locks, chains and steel cables are easily wound through
the ring or attached to the base of the bike stand.*

Blenda Bike Stand

Blenda Design

Blenda is a bicycle stand that creates a sleek barrier. Bicycles can be securely fastened to the upper portion, with the wheel and frame secured on either side. Blenda's sleek, space-saving shape is an excellent alternative to outdoor bicycle racks in commercial areas, car parks or urban courtyards.

Blenda is available with an integrated lighting unit inside.

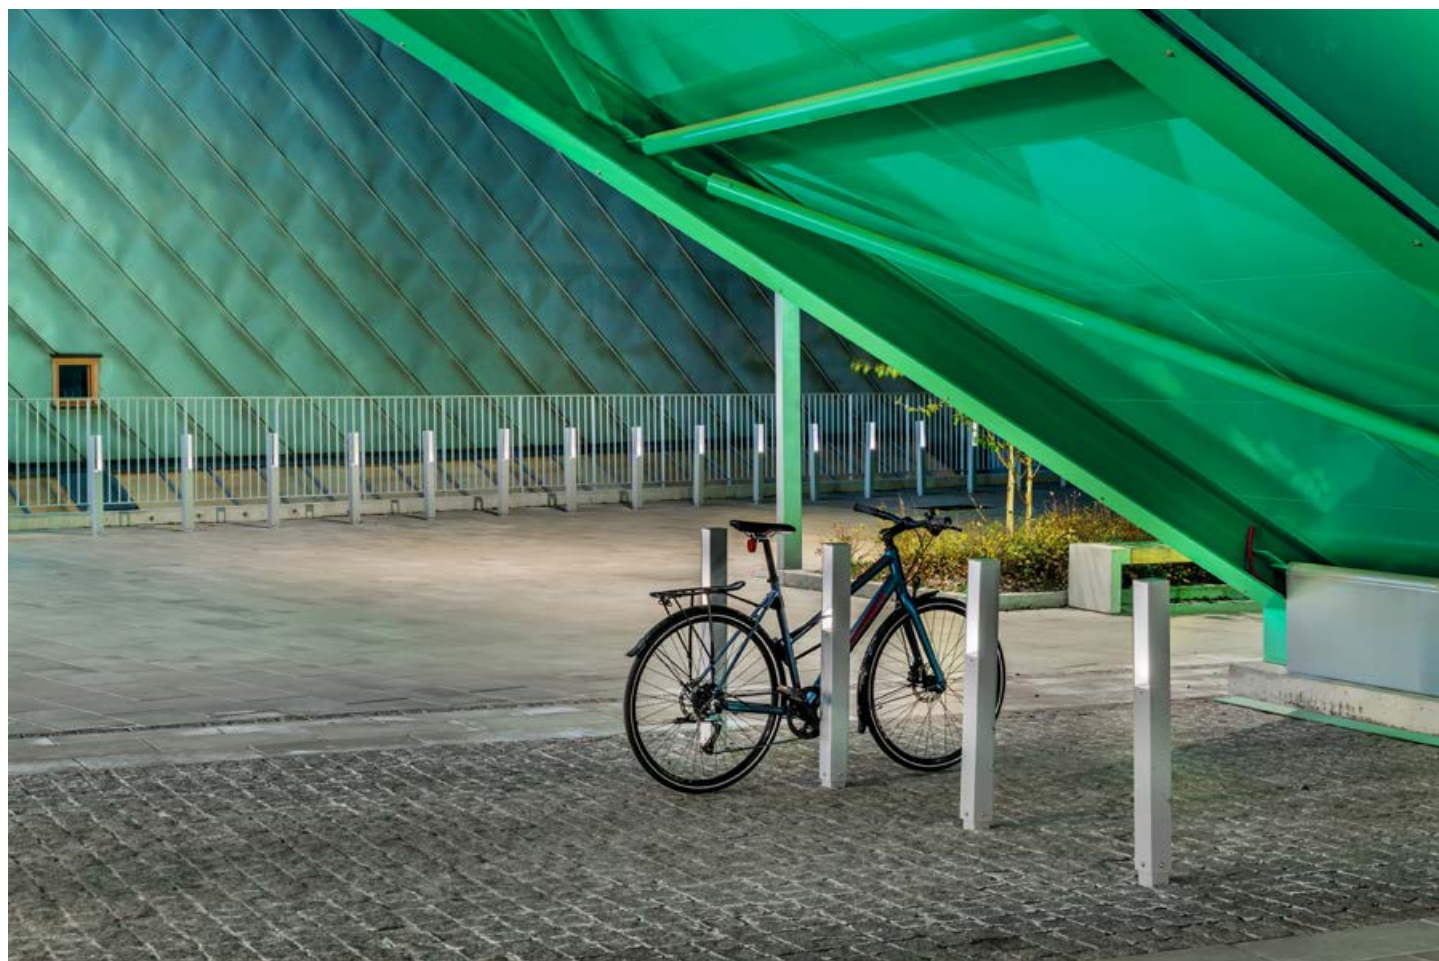

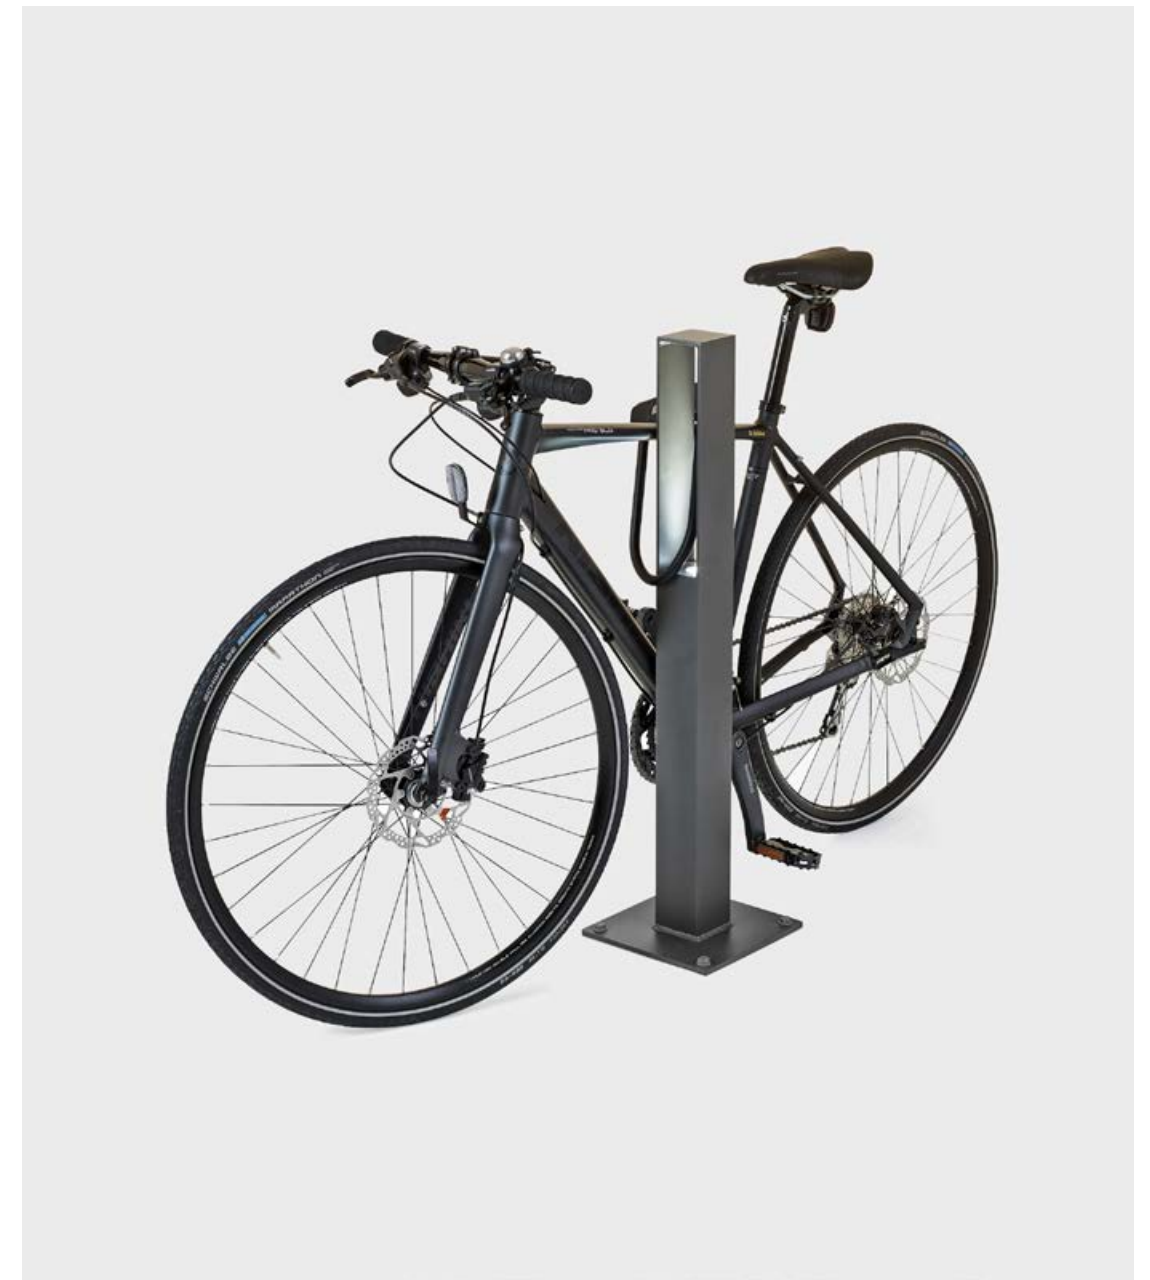

[READ MORE ABOUT BLENDA →](#)
[REQUEST QUOTATION →](#)

Previous page:

The use of LED lighting outdoors brings many benefits during the autumn and winter months in the form of safer and more accessible places for both bikes and people.

Tomtebodan, Stockholm.*

Hook Bike Stand

Note Design Studio

The broad strip of metal forming Hook's structure gives it a robust appearance, but its narrow width makes it appear smaller when viewed from the side. Available in eye-catching orange, pastel blue or light grey, the colour choice can make the cycle stand more visible or enable it to melt seamlessly into the background.

*This page:
Hook, with its functional simplicity, has a
friendly and calm expression that contrasts
with the sometimes harsh urban environment.*

Fogdarp Bike Stand

Anna Kraitz

Designed with practicality in mind, this cycle stand is deliberately streamlined to facilitate use. Sustainable design and environmentally-friendly. The sleekness and simplicity of Fogdarp uses less material than most cycle stands, making it greener to produce. It provides a reliable means of securing cycles, ultimately making them less vulnerable to theft.

Goggle Bike Stand

Nola Studio

The Goggle bicycle stand is an efficient combination of metal rings and free-standing poles. Sleek metal rings at the top provide fixtures where bicycles can be securely locked. The bicycle stands can be positioned in a long row or arranged in curving shapes to complement the landscape around them. This bike stand can be used on its own or as an efficient complement to the Goggle 2 system.

foundation or cast into ground with extended post.*

Goggle 2 Bike Stand

Nola Studio

The Goggle bicycle stand is an efficient combination of metal rings and free-standing poles. Sleek metal rings at the top provide fixtures where bicycles can be securely locked. The bicycle stands can be positioned in a long row or arranged in curving shapes to complement the landscape around them. This bike stand can be used on its own or as an efficient complement to the Goggle system.

Biker's Rest Bicycle Rest

Marcus Abrahamsson

This bicycle rest gives cyclists a footrest to lean against and a handle to hold on to while waiting at traffic lights. The metal mesh insert on the footrest provides a grip to push off from, while the handle helps the cyclist maintain an upright position. Crafted from tubular steel and extruded metal, the bollard coordinates well with most features in the urban landscape, including the traffic light itself.

Burgundy or green as standard colors.*

*Right:
Biker's Rest is equipped with a gripping handle at the top
and a relief foot ring at the height of the bike pedal.*

Ekeberg Bicycle Rack

Klock & Sæther

Ekeberg enables individual bicycles to be parked in place and held upright. Ekeberg's frame can hold the bicycle's front wheel securely, while also providing an upright post where the bicycle frame can be securely locked. An excellent choice for contemporary settings, Ekeberg's design enables bicycles to stand neatly in place.

Ekeberg is easily placed in a row and bolted
to the ground.*

Paus Rest Support & Bicycle Rack

Nina Jobs

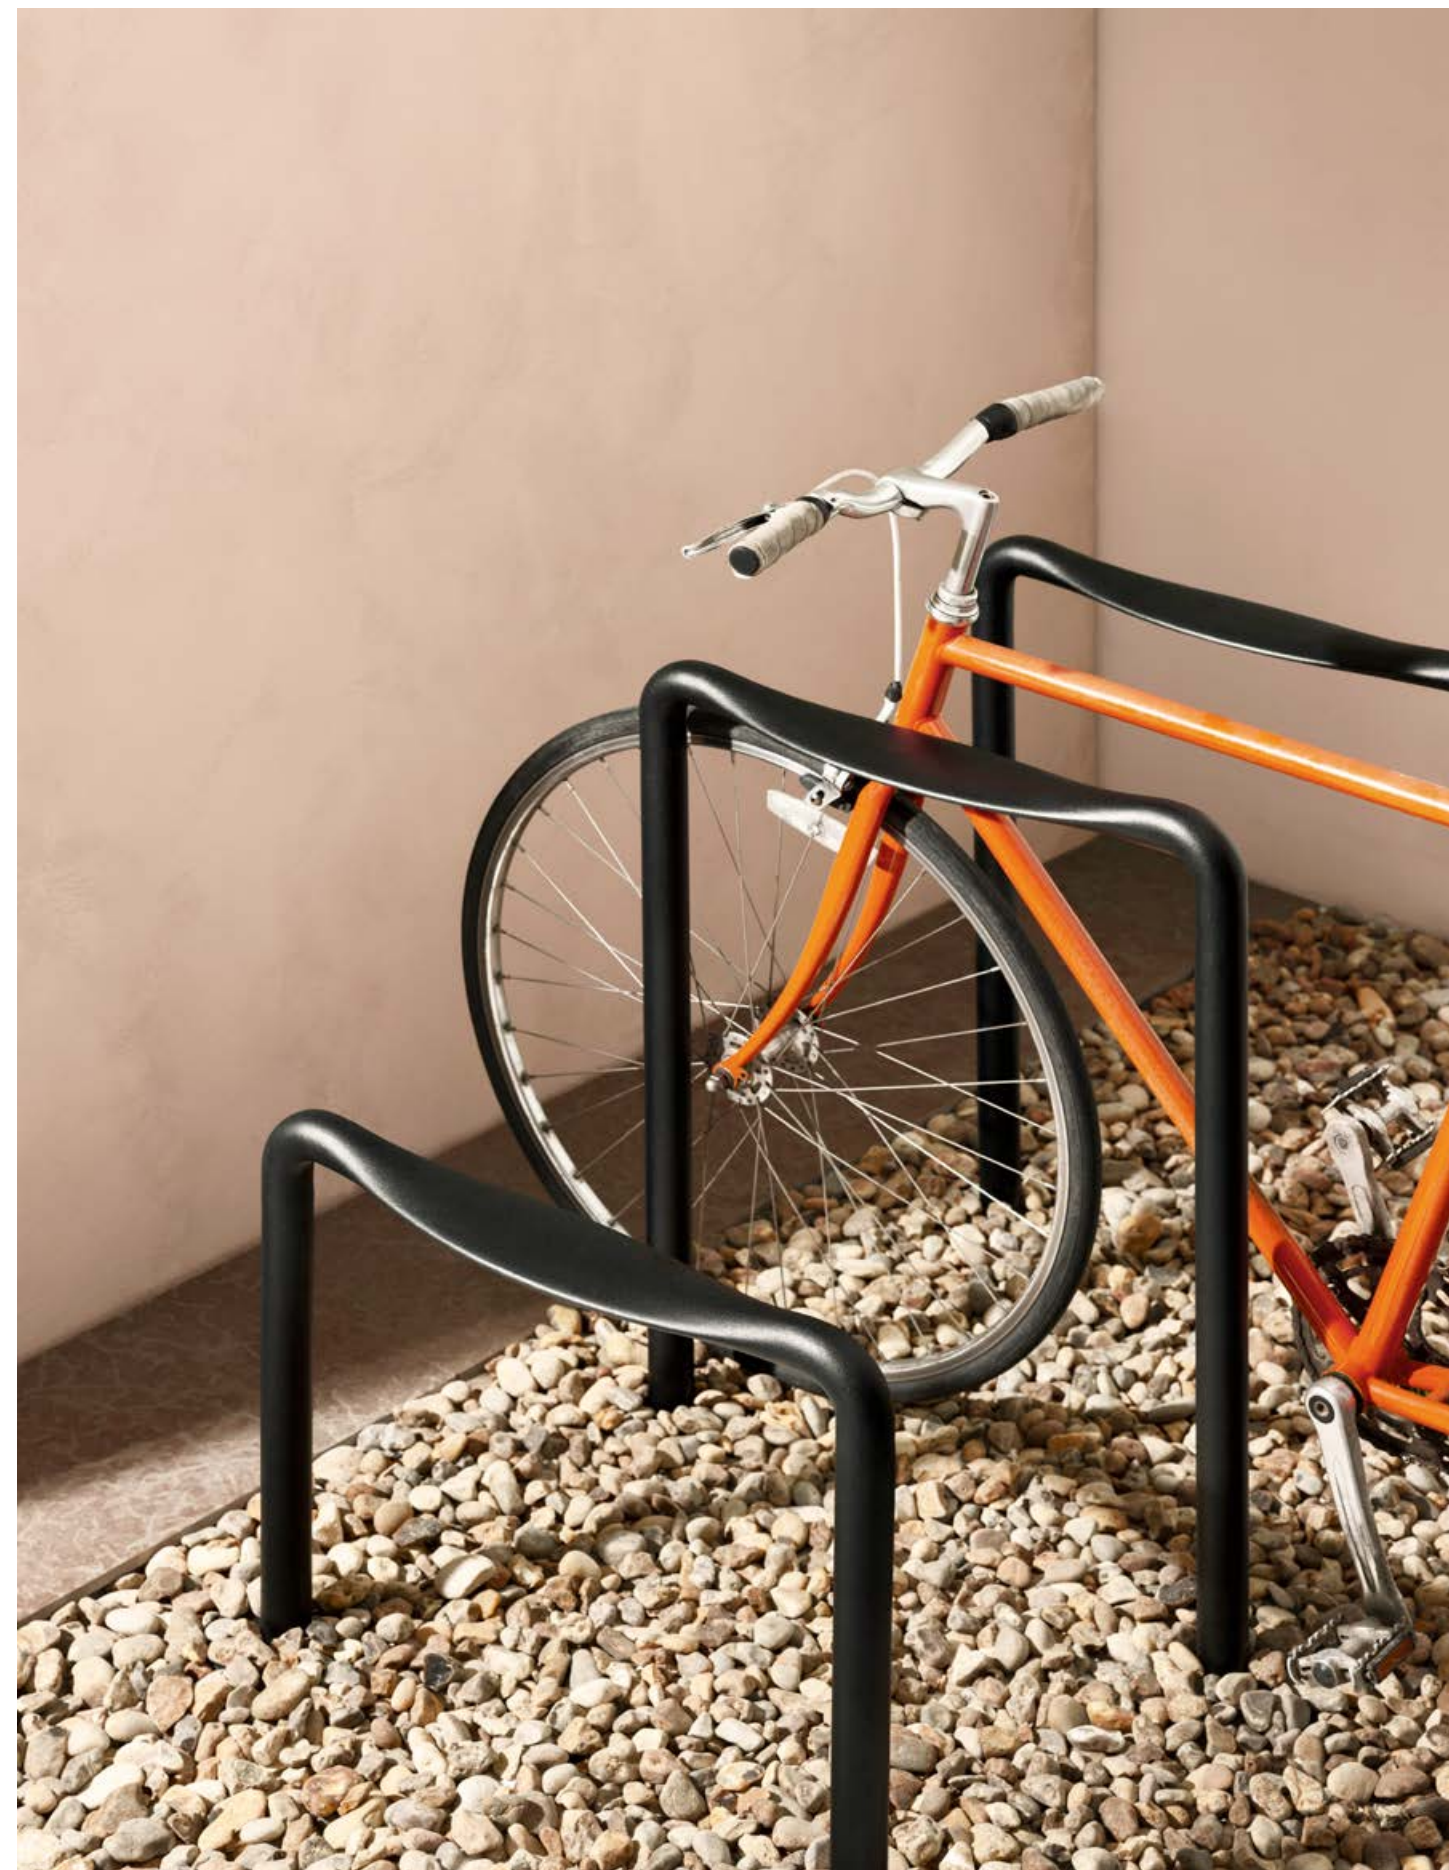

Paus is a range which brings a sense of speed and efficiency to the user. A simple, but flexible place to pause for a while in public spaces. The design is made of sand-cast aluminium and is sculpted to make the most comfortable sitting experience, despite its small surface area. Paus is available in three heights suitable for different purposes: high, low and somewhere in between.

Paus is available as a bike support in two different
heights, 77cm and 55cm. For both adults and children.*

Goggle Bicycle Rack

Nola Studio

The Goggle bike rack is characterised by galvanised hoops fastened to horizontal bars. The hoops are constructed from pairs of circular metal sized to hold the bicycle wheel. A range of rack alternatives is available, making Goggle a uniquely versatile system. The hoops can be attached to a base plate, a single bar, a double-sided rack or secured to a purpose-built structure for a decorative effect. The ground-mounted single-sided version is also available with a wooden ledge along the top.

Simple and affordable rike rack system for all
types of bicycle tires.*

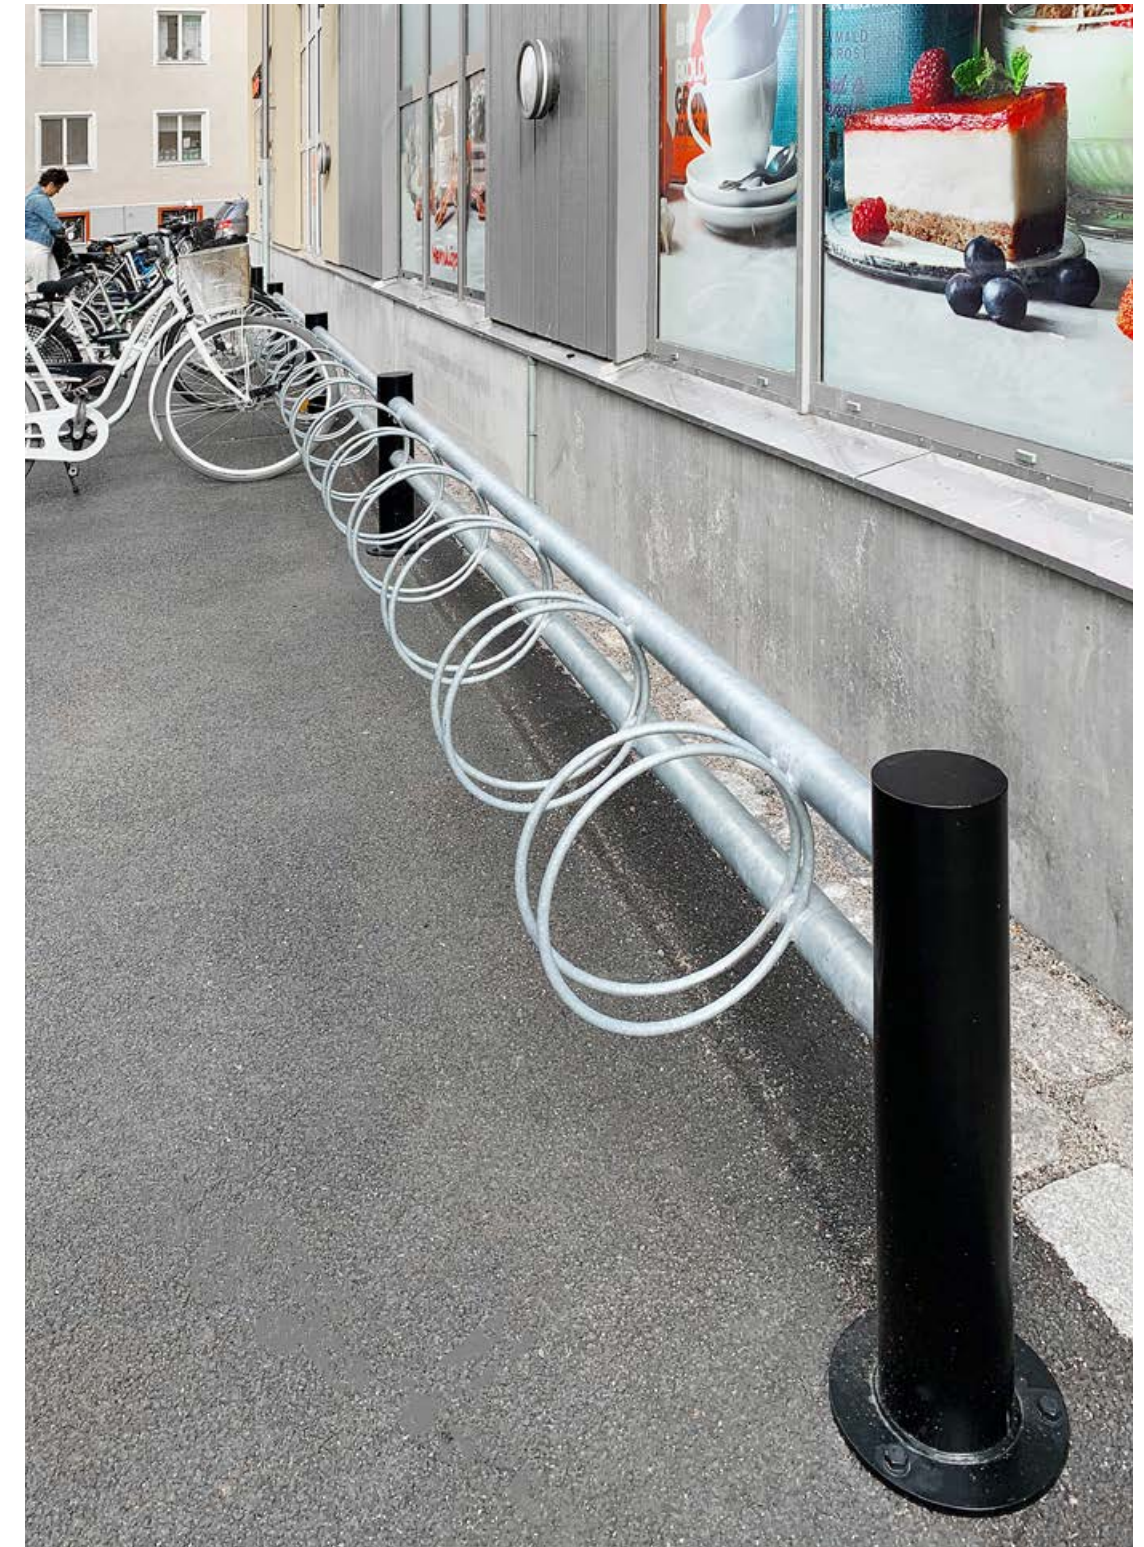

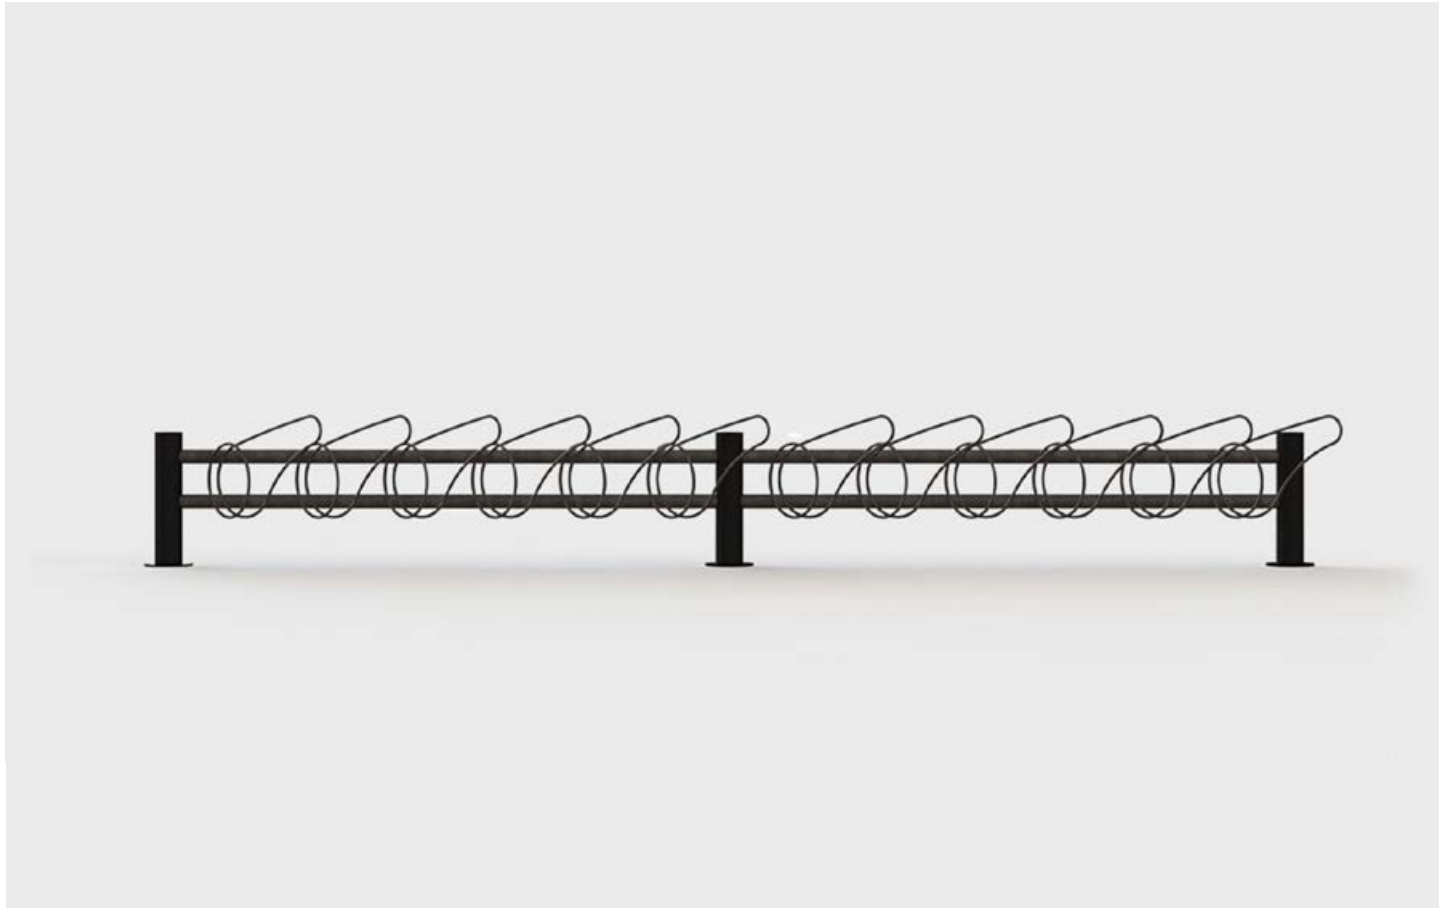

Goggle 2 Bicycle Rack

Nola Studio

The Goggle 2 bike rack is comprised of a series of galvanised hoops fastened to horizontal bars. A range of alternatives is available, making Goggle 2 a uniquely versatile system. The hoops can be attached to a base plate, a single bar, a double-sided rack or secured to a purpose-built structure. The ground-mounted single-sided version is also available with a wooden ledge along the top.

and with frame locking.*

Örebro Bicycle Rack

Nola Studio

Örebro is formed by a length of bent steel resting on two legs. Double steel strips are designed to hold bicycle wheels securely in place, providing space for chains and locks to be securely fastened. Örebro's simplicity enables it to blend in with outdoor urban settings and contemporary architecture.

straight from the front..*

Seagull Bicycle Shed

Kristofer Hansén

Like the wings of a bird, the roof of the Seagull bike shed is made in an aerodynamic shape that appears to be in flight. The overhead structure is crafted in streamlined supporting struts attached to a central girder and bolted to round supports. The roof is available as a single structure or as a double-sided design. Seagull is available in standard lengths of four, six and eight metres.

[READ MORE ABOUT SEAGULL →](#)

[REQUEST QUOTATION →](#)

Mobilia Bicycle Shed

*Sydväst Architecture
& Landscape*

The Mobilia bike shed is made from sheets of UV-resistant polycarbonate and designed with the same considerations as a modern building. Several can be installed in a row to form a longer length, or placed back-to-back to create a double structure. The gradient encourages rain to run off and the design avoids deep gutters that trap leaves. The steel parts in the frame are C4 treated, zinc-electroplated and powdercoated. The frame and bicycle wheel holders can be bolted to a pre-cast concrete base for easy assembly.

[REQUEST QUOTATION →](#)

Våg Bicycle Shed

Snøhetta

With its lightweight fibreglass construction, Våg almost seems to float over the landscape. Våg is designed and produced in sections that can be positioned laterally, running parallel to a building's façade or following the length of a carpark, city or transport hub. Våg was designed as a complement to contemporary architecture and suits any modern outdoor development.

[READ MORE ABOUT VÅG →](#)
[REQUEST QUOTATION →](#)

Revet Bicycle Shed

Bengt Isling

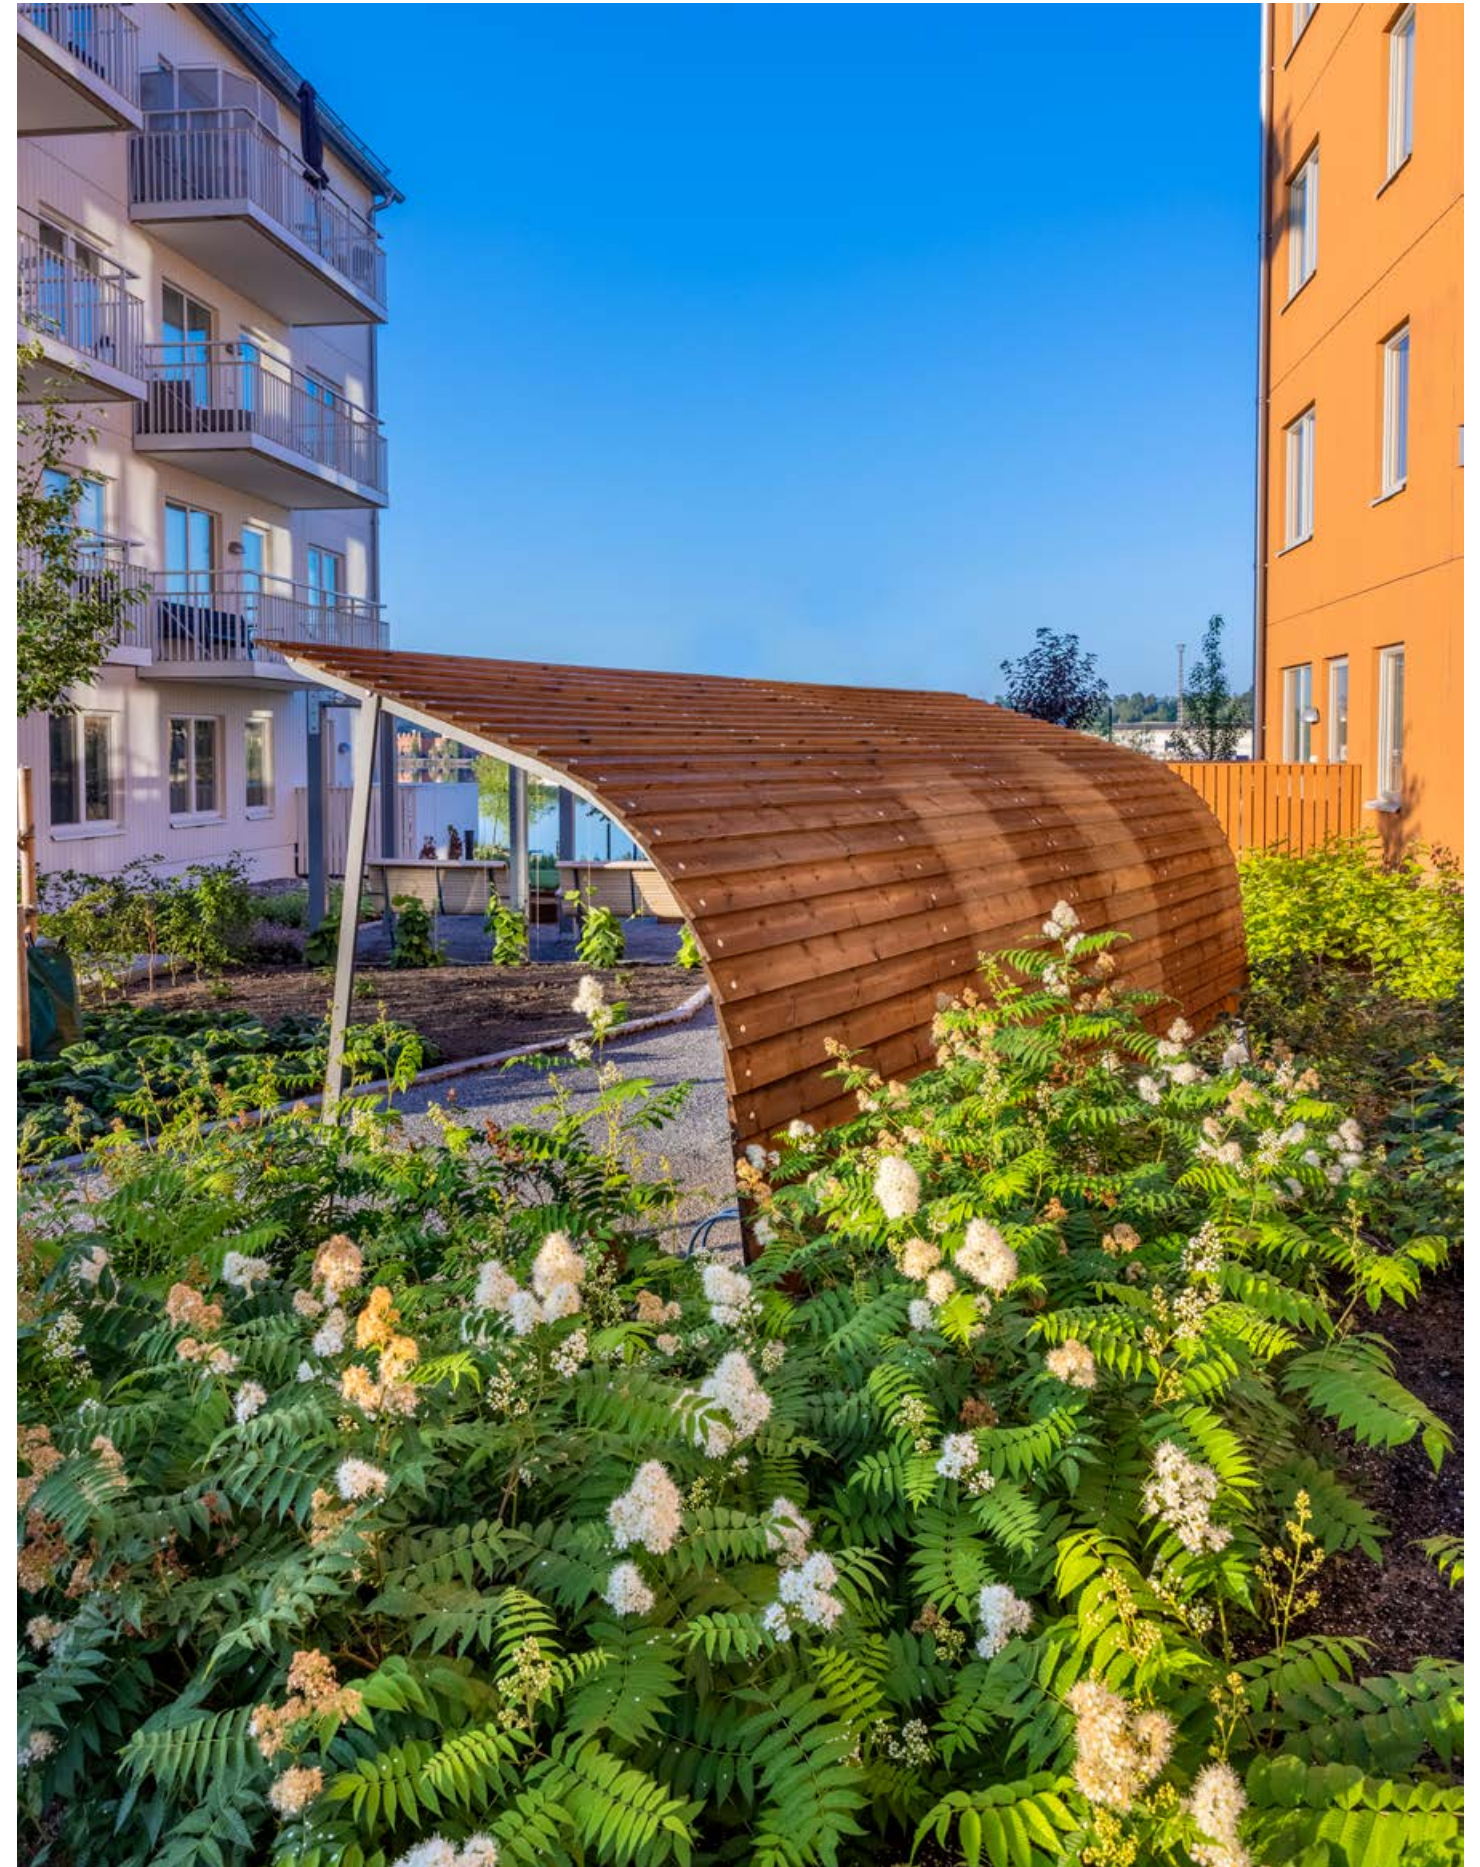

The Revet bike shed is a purpose-built enclosure with plenty of room for bicycles. This easy-to-assemble prefabricated structure is built with a durable wooden roof that curves downward to create a wall. Several structures can be combined side-by-side to create a longer shed.

Revet offers a value-for-money bike shed with the potential to be extended according to specific requirements. Revet can also provide shelter for baby prams and outdoor equipment.
