Organization

Tulpi-design is a Dutch product design company. The company was established in April 2011 and is run by designer Marco Manders and his team of creative professionals and interns.

Tulpi-design is a typical Dutch design studio with a flair for quirky, innovative and playful design for indoor and outdoor environments. Marco Manders achieved international recognition with his Tulpi-seats, which are based on the Dutch national flower, the tulip. Tulpi-seats have been 'planted' all over the world and their popularity continues to 'grow'.

Marco's visionary designs are genuinely eye catching... not just for their organic shapes, which are constant reminders of nature's beauty, but primarily because they epitomise the importance of social design. This designer embraces the cohesion of environment and people, playfully contributing to, and thus enhancing, the value, appearance and importance of our surroundings.

Tulpi products are designed to inject fun and color into our outdoor and indoor environments. The designs confirm Holland's reputation for producing high quality products. Not only was the shape a major focus point during the product development process, but a lot of thought and research went into its ergonomic features and user comfort.

*During Dutch Design Week 2011, an independent jury awarded the Tulpi-Seat the coveted Award for Most Original Design and Good Industrial Design (GIO). In 2015, 2016, 2017 and 2018 Marco Manders received the Bronz, Silver and Golden A' Award and the Silver and Golden IDA award. His Tulpi-Seat was also awarded the APCD * IDA Excellent Award.*

Tulpi-Seat

Even the Dutch Royal Family enjoy sitting on the Tulpi®-Seat.

Tulpi®-Seat

The eye-catching Tulpi®-Seat, developed by Dutch designer Marco Manders, will add color to any environment. The Tulpi®-Seat is a perfect combination of design, ergonomics and sustainability with a huge fun factor!

The Tulpi®-Seat automatically folds when its occupant gets up... guaranteeing a clean and dry seat for the next user!

With full 360 degree rotation, the Tulpi®-Seat lets you pick your own view!

This clever contemporary product is typical of Dutch design, entertaining and quirky. It will 'flower' and brighten up your surroundings!

The Tulpi®-Seat mobile version is available on a ø70 cm stainless steel plate, enabling the user to place the Tulpi®-Seat wherever wanted, including inside.

The Tulpi®-Seat fixed version can be assembled via the pedestal base on a concrete block or pavement.

"A great product has the potential to be life changing. It can be simultaneously beautiful and innovative, useful and creative, designed to solve a problem, make life easier or simply spread joy."

Tulpi®-Glow

The Tulpi®-Glow has RGB-LED units, which can produce a whole spectrum of colors. The user can select his/her own favourite color. With beautiful furniture and atmospheric outdoor lighting, Tulpi®-Glow fits pleasantly in the garden, on the terrace, on the square and in the (glow)park. It is really exciting when the furniture enters into a Joint Venture with the lighting. With luminescent furniture, the useful and aesthetic are combined with the pleasant.

The Tulpi®-Glow is available on a stainless-steel plate, enabling the user to place the Tulpi®-Glow where ever desired, including inside. The Tulpi®-Glow can also be assembled via the pedestal base on a concrete base.

Tulpi-Bin

Tulpi[®]-Bin

This new addition to the Tulpi product line stands out through its bright colors and innovative design. With its cheerful and eye-catching appearance Tulpi[®]-Bin creates an atmosphere that will encourage people to actually have fun throwing away their garbage. Disposing of waste will no longer be seen as 'dull'. This way the Tulpi[®]-Bin contributes to a clean and beautiful world.

The Tulpi[®]-Bin is constructed from a solid round steel post with a welded container tray. A ring for garbage bag or a separate inner tray provides a large capacity for waste. The whole is enclosed by three curved composites petals. The whole is enclosed by three curved composites petals.

Tulpi-ARABESQUE

Tulpi®-ARABESQUE

Tulpi®-ARABESQUE is designer Marco Manders' newest design. This design was not only inspired by the Tulip but also by the typical Arabic ornaments and script. Like the minarets, the shape is slender and elegant. From every angle the brightly colored inner tray is visible. An additional advantage is that the owner can quickly recognize if the tray needs emptying. Marco Manders embraces the cohesion between environment and people, playfully contributing to, and thus enhancing, the value, appearance and importance of the surroundings.

The Tulpi®-ARABESQUE is constructed from a solid round steel post with a welded container tray. A ring for a garbage bag provides a large capacity for waste. The whole is enclosed by two curved composites petals.

Tulpi-Bench

Tulpi[®]-Bench

The Tulpi[®]-Bench gives you the illusion that you are free of the ground. A feeling of sitting in a rocking-chair that can move at any moment. Robust and strong, yet graceful. The colors of the seating area are bright and striking. Sit down and enjoy together.

The Tulpi-Bench is made of aluminium castings, painted in hammered silver. The seat is made of oak beams, painted in the desired RAL color. Available as standard in Signal Red and sizes 1.6, 1.8 and 2 meters.
